

Contents

Preface	xi
1 Basic Concepts	1
1.1 Scope.....	1
1.2 Shape.....	1
1.3 Torque.....	4
1.4 Motor Action	5
1.5 Magnet Poles and Motor Phases.....	7
1.6 Poles, Slots, Teeth, and Yokes.....	8
1.7 Mechanical and Electrical Measures.....	10
1.8 Motor Size.....	12
1.9 Units.....	13
1.10 Summary.....	13
2 Magnetic Modeling	15
2.1 Magnetic Circuit Concepts.....	16
Basic Relationships, 16	
Magnetic Field Sources, 19	
Air Gap Modeling, 20	
Slot Modeling, 23	
Example, 26	
2.2 Magnetic Materials.....	28
Permeability, 28	
Ferromagnetic Materials, 29	
Core Loss, 30	

Permanent Magnets, 32	
Permanent Magnet Magnetic Circuit Model, 36	
2.3 Example.....	39
2.4 Summary.....	41
3 Electrical and Mechanical Relationships	43
3.1 Flux Linkage and Inductance.....	43
Self Inductance, 43	
Mutual Inductance, 44	
Mutual Flux Due to a Permanent Magnet, 46	
3.2 Induced Voltage.....	47
Faraday's Law, 47	
Example, 49	
3.3 Energy and Coenergy.....	50
Energy and Coenergy in Singly-Excited Systems, 50	
Energy and Coenergy in Doubly-Excited Systems, 52	
Coenergy in the Presence of a Permanent Magnet, 53	
3.4 Force, Torque, and Power.....	53
Basic Relationships, 53	
Fundamental Implications, 54	
Torque from a Macroscopic Viewpoint, 55	
Force from a Microscopic Viewpoint, 57	
Reluctance and Mutual Torque, 59	
Example, 59	
3.5 Summary.....	61
4 Brushless Motor Fundamentals	63
4.1 Assumptions.....	63
Rotational Motion, 63	
Surface Mounted Magnets, 63	
4.2 Fundamental Concepts.....	64
Magnetic Circuit Model, 64	
Magnetic Circuit Solution, 68	
Flux Linkage, 70	
Back EMF and Torque, 72	

	Multiple Coils, 74	
4.3	Multiple Phases.....	75
4.4	Design Variations.....	77
	Fractional Pitch Coils, 77	
	Fractional Pitch Magnets, 80	
	Fractional Slot Motor, 82	
4.5	Coil Resistance.....	84
4.6	Coil Inductance.....	89
	Air Gap Inductance, 90	
	Slot Leakage Inductance, 91	
	End Turn Inductance, 93	
4.7	Series and Parallel Combinations.....	94
4.8	Armature Reaction.....	97
	Illustrative Analysis, 98	
	Example, 100	
4.9	Slot Constraints.....	101
	Slot Fill Factors, 101	
	Slot Resistance, 103	
	AWG Wire Gauge Relationships, 103	
	Constancy of N_i , 104	
4.10	Torque Constant, Back EMF Constant, and Motor Constant.....	105
4.11	Torque per Unit Rotor Volume.....	107
4.12	Cogging Torque.....	108
4.13	Reluctance Torque.....	112
4.14	Summary.....	114
5	Motor Design Possibilities	115
5.1	Radial Flux Motors.....	115
	Inner Rotor, 115	
	Outer Rotor, 118	
5.2	Axial Flux Motors.....	118
5.3	Linear Motors.....	120
5.4	Summary.....	122

6	Rotor Magnetic Design	123
6.1	Surface Permanent Magnet Rotors.....	124
6.2	Interior Permanent Magnet Rotors.....	125
	Spoke Magnet Configuration, 128	
	Buried Magnet Configuration, 133	
6.3	Summary.....	139
7	Stator Magnetic Design	141
7.1	Influence of Stator Slots.....	141
7.2	Tooth Flux.....	146
7.3	Stator Yoke Flux.....	150
7.4	Influence of Skew.....	152
7.5	Influence of Ferromagnetic Material.....	154
7.6	Back EMF.....	160
7.7	Slotless Motor Construction.....	162
	Concentrated Winding, 162	
	Sinusoidally Distributed Winding, 165	
7.8	Summary.....	166
8	Windings	167
8.1	Assumptions.....	167
8.2	Coil Span.....	168
8.3	Valid Pole and Slot Counts for Double Layer Windings.....	168
8.4	Winding Layout for Double Layer Windings.....	171
	Example, 172	
	Example, 175	
	Winding Layout Procedure for Double Layer Windings, 180	
8.5	Single Layer Windings.....	180
	Winding Layout Procedure for Single Layer Windings, 182	
	Example, 183	
8.6	Coil Connections.....	183

8.7 Winding Factor.....186

8.8 Inductance Revisited.....188
 Single Tooth Coil Equivalence, 190
 Air Gap Inductance, 190
 Slot Leakage Inductance, 193

8.9 Mutual Inductance.....195
 Air Gap Mutual Inductance, 195
 Slot Leakage Mutual Inductance, 196
 End Turn Mutual Inductance, 197

8.10 Summary.....198

9 Electrical Control 199

9.1 Fundamentals of Torque Productions.....199

9.2 Brushless DC Motor Drive.....201
 Ideal Torque Production, 201
 Motor Constant, 203
 Torque Ripple, 203
 Line-to-Line Back EMF, 204

9.3 AC Synchronous Motor Drive.....206
 Ideal Torque Production, 206
 Motor Constant, 206
 Torque Ripple, 207
 Reluctance Torque, 210

9.4 A Mixed Drive.....211

9.5 General Drive.....212
 Ideal Torque Production , 212
 Torque Ripple, 214
 Motor Constant, 215

9.6 Motor Drive Topologies.....215
 Half Bridge, 215
 Full *H*-Bridge, 217
 Y-Connection, 218
 Δ -Connection, 219

9.7 Torque and Back EMF Constants.....220
 Brushless DC Motor Drive, Y-Connection, 221

AC Synchronous Motor Drive, Y-Connection, 222	
AC Synchronous Motor Drive, Δ -Connection, 223	
9.8 Generator Fundamentals.....	223
9.9 Generator Analysis.....	225
9.10 Summary.....	228
10 Vector and Field Oriented Concepts	231
10.1 Introduction.....	231
10.2 Two Phase Motors and the Park Transformation.....	232
Space Vectors, 234	
Park Transformation, 236	
10.3 Three Phase Motors.....	240
Clark Transformation, 240	
Real Time Implementation, 243	
Space Vector Pulse Width Modulation, 243	
$dq0$ Transformation, 247	
$qd0$ Transformation, 248	
Simulation Equations, 251	
Reluctance Torque, 254	
10.4 Summary.....	256
11 Performance	257
11.1 Motor Constant.....	257
General Sizing, 257	
Motor Constant Maximization, 260	
11.2 Torque Saturation.....	265
11.3 Cogging Torque Relationships.....	271
11.4 Radial Force Relationships.....	276
11.5 Noise and Vibration.....	280
11.6 Core Losses.....	281
Basic Concepts, 281	
Core Loss Modeling, 283	
Application to Motor Design, 285	
Stator Losses, 286	

Rotor Losses, 286	
11.7 AC Winding Resistance.....	289
Summary, 291	
11.8 Motor Drive Limitations.....	292
Y-Connected Motor Analysis, 292	
AC Synchronous Motor Assumption, 293	
Motor Current Solution, 298	
Applied Voltage Solution, 300	
Torque Analysis, 302	
11.9 Summary.....	305
12 Design	307
12.1 Design Guidelines.....	307
Rotor Type, 307	
Number of Magnet Poles, 308	
Number of Stator Slots, 308	
Diameter versus Length, 309	
Rotor Outside Radius, 310	
Number of Turns, 311	
Magnet and Air Gap Dimensions, 312	
General Design Process, 312	
12.2 Detailed Examples.....	313
Default Characteristics, 313	
A 10 Pole, 12 Slot Motor, 314	
A 44 Pole, 48 Slot Motor, 322	
Optimum R_{ro}/R_{so} versus Magnet Count N_m , 326	
Motor Performance versus Slot Count N_s , 328	
Motor Performance versus Magnet Count N_m , 330	
12.3 Illustrative Motors.....	334
Presented Results, 334	
A Fourier Series	493
A.1 Definition.....	493
A.2 Coefficients.....	493
A.3 Symmetry Properties.....	494

A.4	Mathematical Operations.....	495
A.5	Computing Coefficients.....	498
A.6	Summary.....	500
B	Permanent Magnet Magnetic Field in Polar Coordinates	501
B.1	Problem Formulation.....	501
B.2	Polar Coordinate Application.....	503
B.3	Air Gap Solution.....	506
B.4	Magnet Region Solution.....	507
B.5	Summary.....	509
B.6	Magnetization Profiles.....	509
B.7	Examples.....	514
B.8	Summary.....	517
C	Permanent Magnet Magnetic Field in Rectangular Coordinates	519
C.1	Rectangular Coordinate Application.....	520
C.2	Magnetization Profile.....	524
C.3	Summary.....	524
D	Armature Reaction Magnetic Field in Polar Coordinates	525
D.1	Problem Formulation.....	526
D.2	Air Gap Solution.....	527
D.3	Surface Current Density.....	528
D.4	Example.....	529
D.5	Summary.....	531
E	Valid Pole and Slot Counts for Three Phase Motors	533
	$N_m = 2, 4, 6,$ and 8 Pole Motors.....	534
	$N_m = 10, 12,$ and 14 Pole Motors.....	535

$N_m = 16, 18, \text{ and } 20$ Pole Motors.....536

$N_m = 22$ and 24 Pole Motors.....537

$N_m = 26$ and 28 Pole Motors.....538

$N_m = 30$ and 32 Pole Motors.....539

$N_m = 34, 36, \text{ and } 38$ Pole Motors.....540

$N_m = 40$ and 42 Pole Motors.....541

$N_m = 44$ Pole Motors.....542

$N_m = 46$ and 48 Pole Motors.....543

$N_m = 50$ and 52 Pole Motors.....544

$N_m = 54$ and 56 Pole Motors.....545

$N_m = 58$ and 60 Pole Motors.....546

F Symbols, Units, and Abbreviations 547

G Glossary 553

H Bibliography 561

Books.....561

Articles.....567

 Comparison, Review, Survey.....567

 Cogging Torque.....572

 Control.....579

 Core Loss, General.....582

 Core Loss, Rotor.....587

 Design Guidelines, Axial Flux Motors.....592

 Design Guidelines,
 Fractional Slot and Concentrated Winding Motors.....593

 Design Guidelines, General.....596

 Design Guidelines, Interior Permanent Magnet Motors.....605

Design Guidelines, Slotless Motors.....610
Design Guidelines, Surface Permanent Magnet Motors.....612
Inductance and Reactance.....613
Magnetic Fields and Analysis.....615
Noise and Vibration.....626
